HMBS Platinum Disclosure Summary Characteristics

Characteristic	Description
Two Physical Files	<p><u>HMBS Platinum Pool/Security File</u>: Pool/Security information with one record per active pool. This will be one physical file with single header record at beginning of file and single trailer record at end of file.</p> <p><u>HMBS Platinum Pool Supplemental File</u>: Supplemental information for all pools, with multiple records per pool. This will be in one physical file with single header record at beginning of file and single trailer record at end of file.</p>
HMBS Platinum Pool/Security Record Type	One Record Type with basic information about the Pool and also provides the Security RPB, RPB Factor, Security Interest Rate and Weighted Averages (WA) for various attributes. The HMBS Platinum Pool/Security File will only contain a header, trailer, and this one record type for each active pool.
HMBS Platinum Pool Supplemental Record Types	Twelve (12) Supplemental Record Types providing extensive information about the pool activity and characteristics. Most of these record types have common format and enumeration characteristics.
Flexible Format	All Records are produced as text format with Pipe () delimited separation between fields. The files will be published in compressed (zip) format.
Population of Records and Fields	<p>HMBS Platinum Pool/Security Record will always be produced. There can be occurrences of “ ” (bar-bar) where there is no data value for a field.</p> <p>HMBS Platinum Pool Supplemental Records are “data driven” and therefore individual Record Types are produced based on the characteristics of the pool.</p> <p>Fields within Record Types are “data driven” and therefore populated based on characteristics of the pool. There can be occurrences of “ ” (bar-bar), where there is no data value for a field.</p>
Explicit Decimal Point	For fields that have values with decimal points, the HMBS Platinum Pool/Security File records and the HMBS Platinum Pool Supplemental File records will explicitly include the decimal point;
Loan Age	<p>Ginnie Mae has standardized its calculation of Loan Age to be as follows:</p> <ul style="list-style-type: none"> • Loan Age = (the difference between the YYYYMM portion of the loan Origination Date and the YYYYMM of the Reporting Period) + 1 month.

<p>Borrower/Coborrower/Non-borrowing Spouse ages</p>	<p>Ginnie Mae has standardized its calculation of borrower/coborrower/non-borrowing spouse age as follows:</p> <ul style="list-style-type: none"> Age = (difference between the YYYYMM portion of the Birth Date and the YYYYMM of the Reporting Period)
<p>Sort Order of Records</p>	<p><u>HMBS Platinum Pool/Security File</u>: Records will be sorted by Pool ID in ascending order. <u>HMBS Platinum Pool Supplemental File</u>: Records will be sorted by Pool ID (ascending order); Record Type within Pool</p>
<p>Record Type Layouts—Item Number</p>	<p>Each of the Record Type layouts in this document have an “Item” number column. The Item numbers are for documentation reference only, and are not included in the physical output record.</p>
<p>Daily New Issuance, and Monthly Portfolio</p>	<p>The file layouts are the same for: HMBS Platinum New Issuance, and HMBS Platinum Monthly Portfolio disclosures. The Low and Moderate Borrower Income Record stratification record (record type “10”) will not appear in the Daily Platinum New Issuance files.</p>
<p>Implementation Dates</p>	<p>The Daily New Issuance Files, as well as the Monthly Portfolio files are targeted for production release beginning in the 4th quarter 2024.</p>
<p>Production Test Files (for Version 2.0)</p>	<p>Sample Production test files for the HMBS Platinum Disclosures will be available in the 3rd quarter 2024.</p>
<p>Transition Period</p>	<p>Ginnie Mae will produce the existing HMBS Platinum Disclosure File V1.1 files and the HMBS Platinum Disclosure File V2.0 files, in parallel, for a period of at least 3 months.</p>

General Characteristics of the Files and Records

This section of the document provides an overview of the common characteristics of the records in the files. The detailed technical specification of files and record formats is in the following section of this document.

HMBS Platinum Pool/Security File—The records in this file have a single common format, where there is one record per pool with specified fields. This file does not have stratifications or enumerations.

HMBS Platinum Pool Supplemental File—The records in this file are standardized and have stratifications and enumerations. There are 3 unique, different record layouts.

- Unique Record Types
 - Unique Record – Record Type “01”

- Common Stratification Layouts
 - One-Field Stratification Records – Record Types “02” – “11”
 - Two-Field Stratification Record – Record Type “12”
